COMPILE SHELVING SYSTEM

"Storage is important because it is so universal: everybody needs good solutions. The inspiration for the Compile Shelving System was indeed the everyday storage situation. The design, with its logical construction, parallels to a certain degree an unpretentious Scandinavian lifestyle—one shelf represents one building unit while the length of the tube defines the shelf height. In this simple way one can assemble practical formations that fit individual needs—Compile should reflect and accommodate the life of which it is part."

— Cecilie Manz

Designed by	Cecilie Manz / 2016
Environment	Indoor
Country of Production	Poland
Assembly Required	Yes
Description	A contemporary take on the classic shelving system. Compile consists of a shelf and three heights of dividing tubes. Arrange the shelves and tubes as you please or order from the prearranged configurations.
Material	Powder coated steel.
Cleaning & Care	Remove dust from shelves with a soft cloth.
Additional Product Information	Compile systems should always be mounted to a wall, using wall brackets. A Compile Shelving System can hold up to 300 kg / 660 lbs. Compile Shelving Systems can be built as tall as wanted, as long as they are mounted to a wall using brackets. Muuto recommends not building Compile systems higher than 225 cm / 88.6".

TESTS & CERTIFICATIONS

EN 16121:2013*	Test severity I. Non-domestic storage furniture. Requirements for safety, strength, durability and stability.
EN 16122:2012*	Domestic and non-domestic storage furniture. Test method for the determination of strength, durability and stability. *Both tests were conducted using a 180 cm / 70.75" shelving configuration with wall brackets attached to the wall.
ANSI/BIFMA X5.9-2019*	American National Standard For Office Furnishings – Storage Units. *Tested with wall brackets attached to the wall.

RESTORE SERIES

"I wanted for the Restore Series to have a humble character, allowing for it to easily fit into any environment. With its felt material made using fibers from recycled plastic bottles, the Restore Series has a curious and inviting expression while its corner slits bring a distinct look and added functionality to the design."

— Mika Tolvanen

Designed by	Mika Tolvanen / 2009
Environment	Indoor
Country of Production	China
Description	Made from a felt made of recycled plastic bottle fibers, the Restore Series is a functional and versatile storage unit that can be used for almost any object from laundry to blankets to children's toys. The Restore Series comes in a variety of colors and offers a textural, quirky addition to any home or professional space.
Material	The material is PET felt fibers. A percentage of the product comes from recycled plastic bottles, which are granulated, heated and blown like little fibers that are subsequently dyed. The fibers are worked together like mats, which can be pressed over heat-influenced forms that enables the material to maintain its shape.
